Preface

This volume contains the papers presented at EWRL 2011: the 9th European Workshop on Reinforcement Learning held in Athens Greece, September 9-11, 2011. The workshop was co-located with the European Conference on Machine Learning and Principles and Practice of Knowledge Discovery in Databases (ECML PKDD 2011). The technical program of EWRL 2011 contained 38 plenary talks by authors of submitted papers and 4 plenary invited talks:

- Peter Auer (University of Leoben, Leoben, Austria), "UCRL and Autonomous Exploration";
- Kristian Kersting (Fraunhofer IAIS and University of Bonn, Bonn, Germany), "Increasing Representational Power and Scaling Inference in Reinforcement Learning";
- Peter Stone (University of Texas Austin, USA), "PRISM Practical RL: Representation, Interaction, Synthesis, and Mortality"; and
- Csaba Svepesvari (University of Alberta, Canada), "Towards Robust Reinforcement Learning Algorithms".

All authors of presented papers were invited to present their papers at an evening poster session held on September 10; posters were also solicited for latebreaking results with the option to submit a full paper after the workshop.

In total, there were 40 submissions to the workshop from a total of 58 authors representing 18 countries (9 European). All papers were reviewed by at least 2 reviewers, with some papers receiving a 3rd review. We had an international program committee of 24 members and 9 additional reviewers residing in 11 countries (7 European). Reviewing proceeded in two rounds: 24 of 39 submitted papers were accepted to the LNAI proceedings in the first round; after the workshop authors were allowed to resubmit previous submissions or submit new papers from latebreaking posters in a second round of reviewing in which 4 of 14 submissions (13 resubmissions, 1 new submission) were accepted to the LNAI proceedings. The present volume contains the texts of the 28 papers accepted to the LNAI proceedings in the first and second round.

The best paper prize of 500 Euro was awarded to the paper "Automatic discovery of ranking formulas for playing with multi-armed bandits" by authors Francis Maes, Louis Wehenkel and Damien Ernst (University of Liège, Belgium).

EWRL was first held in 1995 and has been held every 2-3 years since that time. Over the years, EWRL has become one of the premiere events for the discussion and dissemination of recent research results in the field of reinforcement learning. This year's workshop was organized by Marcus Hutter (Australian National University, Canberra, Australia), Matthew Robards (Australian National University, Canberra, Australia), Scott Sanner (NICTA and Australian National University, Canberra, Australia), Peter Sunehag (Australian National University, Canberra, Australia), Peter Sunehag (Australian National University, Canberra, Australia), and Marco Weiring (University Of Groningen, Groningen, Netherlands).

We would like to thank our financial sponsors: the Artificial Intelligence Journal, the Australian National University, NICTA, and PASCAL2. Their generous support has allowed us to continue the tradition of holding EWRL as a free event open to all interested participants. We would like to thank ECML PKDD 2011 for allowing us to co-locate with them and for advertising EWRL on their website. We are grateful that we could use the excellent conference management system EasyChair, which has been developed mainly by Andrei Voronkov and hosted at the University of Manchester; the system is cost-free. We thank Springer for their support in preparing and publishing this volume of Lecture Notes in Artificial Intelligence.

Last but not least, we wish to thank the organizers, program committee members, additional reviewers, authors, speakers and all attendees for this engaging and highly successful installment of EWRL.

February 2012

Scott Sanner Marcus Hutter

With thanks to our EWRL 2011 sponsors:

Table of Contents

Invited Talk Abstracts

UCRL and Autonomous Exploration Peter Auer	1
Increasing Representational Power and Scaling Inference in Reinforcement Learning Kristian Kersting	2
PRISM – Practical RL: Representation, Interaction, Synthesis, and Mortality <i>Peter Stone</i>	3
Towards Robust Reinforcement Learning Algorithms Csaba Szepesvari	4

Online Reinforcement Learning

Automatic discovery of ranking formulas for playing with multi-armed	_
bandits	5
Francis Maes, Louis Wehenkel and Damien Ernst	
Goal-Directed Online Learning of Predictive Models	17
Sylvie Ong, Yuri Grinberg and Joelle Pineau	
Gradient Based Algorithms with Loss Functions and Kernels For	
Improved On-Policy Control	29
Matthew Robards and Peter Sunehag	

Learning and Exploring MDPs

Active Learning of MDP models Mauricio Araya-López, Olivier Buffet, Vincent Thomas and François Charpillet	41
Handling Ambiguous Effects in Action Learning Boris Lesner and Bruno Zanuttini	53
Feature Reinforcement Learning in Practice Phuong Nguyen, Peter Sunehag and Marcus Hutter	65

Function Approximation Methods for Reinforcement Learning

Reinforcement learning with a bilinear Q function	77
Charles Elkan	

L1-penalized projected Bellman residual Matthieu Geist and Bruno Scherrer	88
Regularized Least Squares Temporal Difference learning with nested 12 and 11 penalization Matthew Hoffman, Alessandro Lazaric, Mohammad Ghavamzadeh and Remi Munos	100
Recursive Least-Squares Learning with Eligibility Traces Bruno Scherrer and Matthieu Geist	112
Value Function Approximation through Sparse Bayesian Modeling Nikolaos Tziortziotis and Konstantinos Blekas	124
Macro-actions in Reinforcement Learning	

Policy Search and Bounds

Robust Bayesian reinforcement learning through tight lower bounds Christos Dimitrakakis	172
Optimizing look-ahead tree search policies Francis Maes, Louis Wehenkel and Damien Ernst	184
A Framework for Computing Bounds for the Return of a Policy Cosmin Paduraru, Doina Precup and Joelle Pineau	196
Multi-task and Transfer Reinforcement Learning	
0	
Transferring Evolved Reservoir Features in Reinforcement Learning Tasks Kyriakos Chatzidimitriou, Ioannis Partalas, Pericles Mitkas and Ioan- nis Vlahavas	208

- Anestis Fachantidis, Ioannis Partalas, Matthew Taylor and Ioannis Vlahavas
- Multi-Task Reinforcement Learning: Shaping and Feature Selection 232 Matthijs Snel and Shimon Whiteson

Multi-agent Reinforcement Learning

Transfer Learning in Multi-agent Reinforcement Learning Domains	244
Georgios Boutsioukis, Ioannis Partalas and Ioannis Vlahavas	
An avtancian of a hierarchical rainforcement learning algorithm for	
multisgent acttings	256
multiagent settings	200
Ioannis Lambrou, Vassilis Vassiliades and Chris Christodoulou	

Apprenticeship and Inverse Reinforcement Learning

Bayesian multitask inverse reinforcement learning	268
Christos Dimitrakakis and Constantin Rothkopf	
Batch, Off-policy and Model-free Apprenticeship Learning	280
Edouard Klein, Matthieu Geist and Olivier Pietquin	

Real-world Reinforcement Learning

Introduction of Fixed Mode States into Online Profit Sharing and Its Application to Waist Trajectory Generation of Biped Robot Seiya Kuroda, Kazuteru Miyazaki and Hiroaki Kobayashi	292
MapReduce for Parallel Reinforcement Learning Yuxi Li and Dale Schuurmans	304
Compound Reinforcement Learning: Theory and An Application to Finance	316
Proposal and Evaluation of the Active Course Classification Support System with Exploitation-oriented Learning Kazuteru Miyazaki and Masaaki Ida	328

Organizing Committee

(General Workshop Chair)
(Local Organizing Chair)
(Program Committee Chair)
(Treasurer)
(Miscellaneous)

Program Committee

Edwin Bonilla	NICTA and Australian National University
Emma Brunskill	University of California, Berkeley
Peter Dayan	University College London
Carlos Diuk	Princeton University
Alan Fern	Oregon State University
Fernando Fernandez	Universidad Carlos III de Madrid
Mohammad Ghavamzadeh	INRIA Lille
Marcus Hutter	Australian National University and NICTA
Kristian Kersting	Fraunhofer IAIS and University of Bonn
Shie Mannor	Technion
Ronald Ortner	University of Leoben
Joelle Pineau	McGill University
Doina Precup	McGill University
Matthew Robards	Australian National University and NICTA
Scott Sanner	NICTA and Australian National University
Guy Shani	Ben Gurion University
David Silver	University College London
Peter Sunehag	Australian National University
Prasad Tadepalli	Oregon State University
Matthew Taylor	Lafayette College
William Uther	NICTA and the University of New South Wales
Martijn Van Otterlo	Katholieke Universiteit Leuven
Thomas Walsh	University of Arizona
Marco Wiering	University of Groningen

Additional Reviewers

Shào, Wén Van Hasselt, Hado Vroman, Monica Visentin, Daniel
